

SUBJECT: Upgrade of 5 ton CT LT four-post electro-hydraulic lifts to EVO version

We are pleased to inform you that, from September 2024, the 5 ton CT LT four-post electro-hydraulic lifts made in Italy will be available in their **EVO** version.

This version, which replaces the previous ones, is an upgrade of the lifts that sees the introduction of following improvements:

- New higher-performance LT cylinders
- New control column (new design for FRL unit fixing and new motor position)
- New thickness of the mechanical lock for a better adjustment
- New FRL unit (filter/air pressure regulator/lubricator)
- New pneumatic connection
- New oil container for FRL unit

- New positioning of components in the hydraulic unit to obtain more space for the new ventilated motor
- New servo-ventilated motor
- New hydraulic pipes
- New oversized tank
- New protection guard with improved ventilation
- New user manual

As a result of the improvements implemented on EVO lifts, an increase in their price is expected, which will come into force starting from **November 2024**. No surcharge will be applied until then and the current price will therefore remain valid.

Please find below the list of codes of the new **EVO** models:

0-43609701/15 - TECO 5004 CT LT EVO 400V 3Ph 50/60Hz

0-43609711/15 - TECO 5004 CT LT EVO 230V 3Ph 50/60Hz

0-43309721/15 - TECO 5004 CT LT EVO 230V 1Ph 50Hz
